EASY PRESENTING

EPSON **ELP DC-06**

The new Epson ELP DC-06 visualiser

- Easy to carry, weight under 1kg
- Two-in-one USB cable connection
- Powerful 4x digital zoom, 90° head rotation and autofocus function
- Practical freeze function
- Secure with Kensington lock hole

You might have wondered how to display large printed pages and illustrated documents without first photocopying them? And what about showing 3D or fragile objects close up to a large audience? Now you can do all this, with the Epson ELP DC-06 visualiser, a portable and adjustable camera that attaches directly to a computer or one of Epson's latest projectors.

Innovative, flexible and easy to use

Incorporating our advanced technologies, the Epson ELP DC-06 is a compact and affordable desktop solution for enlarging the source materials you can display while drastically cutting preparation time.

The Epson ELP DC-06 visualiser only takes seconds to set up. You can connect directly to the new Epson EB-8 projector series and future Epson projectors thanks to the direct USB connection and two-in-one cable. It also lets you work via a computer. Just plug in, unfold the arm and you're ready to focus.

Lively presentations

Visual quality is guaranteed with 2 million pixel resolution and powerful zoom allowing you to focus on details. The camera can be turned 90° in different axis and the height adjusted, so you can even capture 3D objects, or an entire board.

Highly portable, modern design

The Epson ELP DC-06 visualiser does not need a separate power supply, making it very compact. It is light, and the arm folds down neatly into the base making it easy to carry. With power consumption of less than 2.5W it meets modern ecological standards.

EPSON®
EXCEED YOUR VISION

PRODUCT DIMENSIONS AND SPECIFICATIONS

EPSON **ELP DC-06**

IMAGE	
Pick up device	1/3" CMOS Sensor
Total pixels	2 Million pixels
